Online Resources for the Educational Use of iPads
with children who are blind, visually impaired or deafblind

Research and Educational Tools

Infant & Early Childhood Program iPad Curriculum
http://www.juniorblind.org/site/infant-a-early-childhood-program-ipad-curriculum
Laura Campaña and staff from Junior Blind demonstrate how our Infant & Early Childhood Specialists use iPad tablets and applications during in-home early intervention services provided to young children who are blind, visually impaired or multi-disabled. This is available as a DVD.

The iPad as an Informal Assessment Tool
Gloria Rodriguez-Gil of California Deaf-Blind Services shares ideas on assessment.

iPad, iPod, iPhone – iTechnology and apps that have been used successfully with individuals with deafblindness or with visual impairments and additional disabilities
http://www.pathstoliteracy.org/technology/ipad-ipod-iphone
Linda Mamer, Deafblind Consultant (British Columbia) shares a how-to paper, with sample observational sheets, sample observational sheets that have been filled in, and a list of current apps. The iPad is viewed as an observational or assessment tool to gather information, visually, auditorially, tactually, to be able to design individualized communication systems based on the child's responses.

iStimulation Presentation
http://www.juniorblind.org/site/istimulation-ctebvi-2012-presentation
Laura Campaña of Junior Blind presents research comparing the use of an APH lightbox and an iPad for vision stimulation with young children who are visually impaired with additional disabilities.

iTechnologies (iPads, iPhones, iTouch)
http://www.nationaldb.org/ISSelectedTopics.php?topicCatID=853
The National Consortium on Deafblindness has compiled a list of resources for using iOS devices with students who are deafblind.
