

ALL ABOUT POPCORN

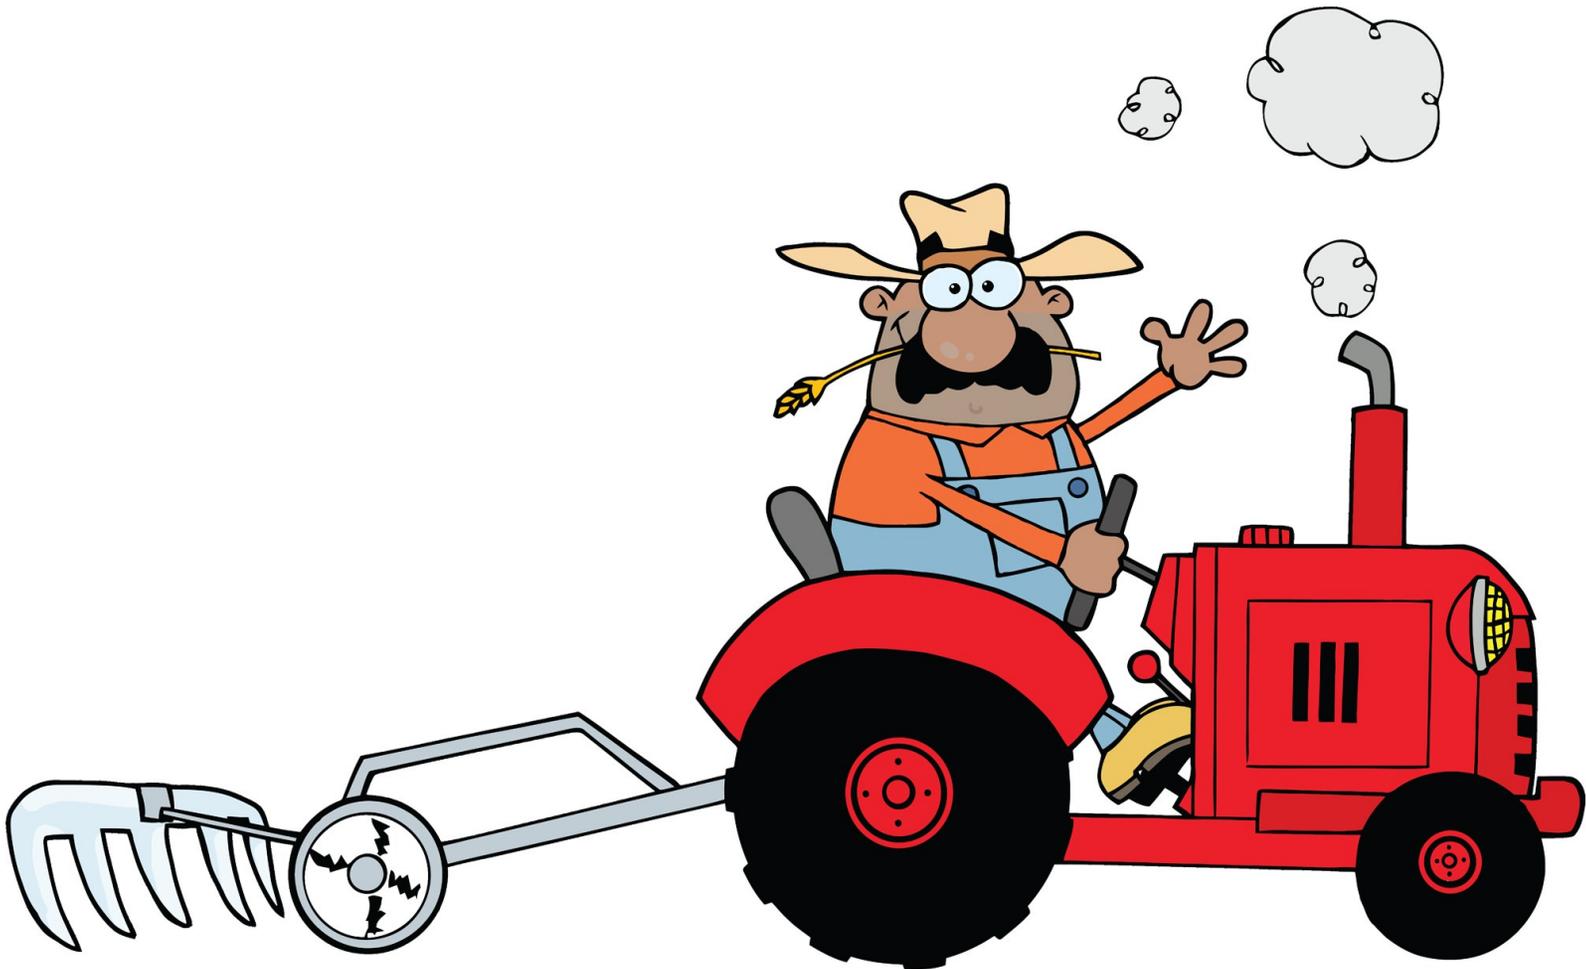

**Popcorn is made from corn.
The corn ear has many kernels on it.
Each kernel can grow more corn!**

The kernels are the corn seed.

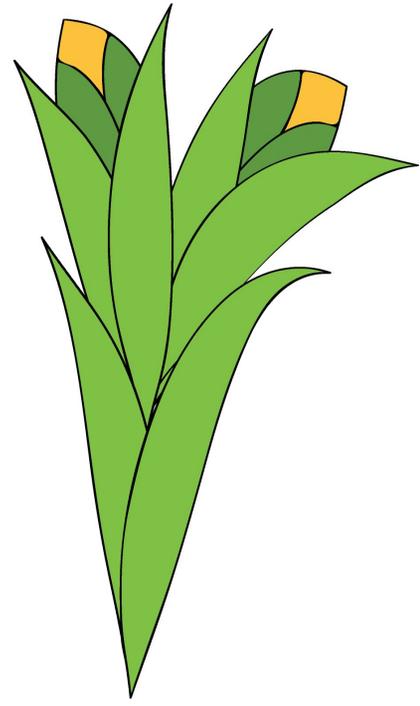

**A farmer plows the ground so that it becomes soft.
Then he plants the corn seeds into the soft ground
and covers them with dirt.**

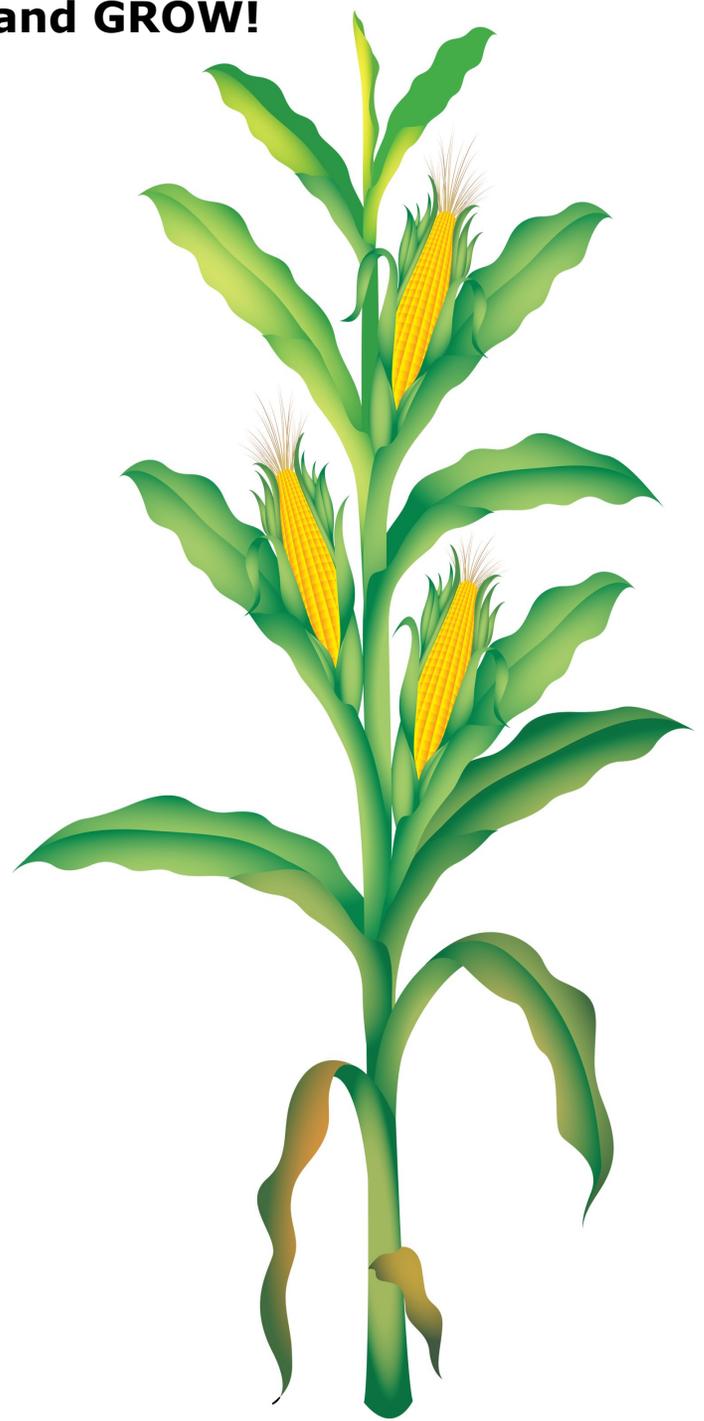

The seed begins to grow...

and grow...

and GROW!

The seeds grow into corn stalks and each stalk grows corn ears. Now the corn ear is ready to be picked by the farmer.

The farmer enjoys picking the corn.

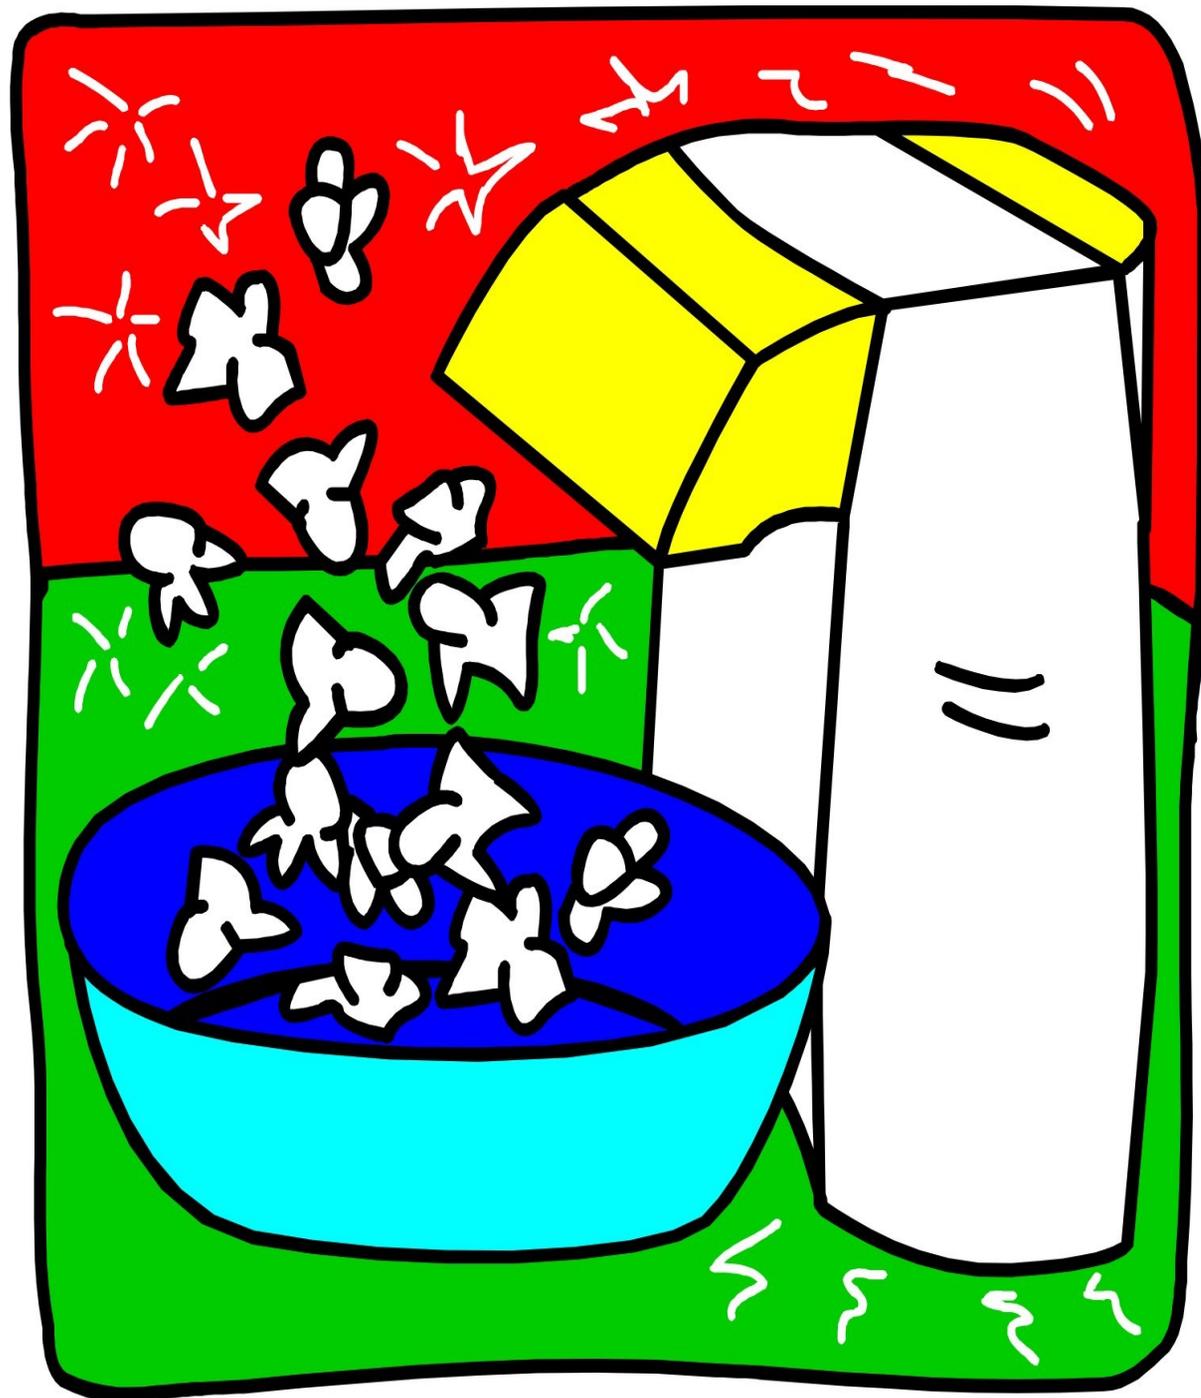

**Each kernel of corn is removed from the corn ear.
Some of the kernels are saved to be corn seed for the next crop.
Some of the kernels are used to make ...**

POPCORN!

We put the kernels of corn into a popcorn popper and it makes fluffy, tasty popcorn.

YUMMY!

**Popcorn tastes very good and is lots
of fun to eat!**
