With her song book in her hands, her mouth open wide, her eyes down cast as she reads, what an angel for Christmas! She looks pretty in blue, in pink, in yellow. Notice her wavy hair, her pointed wings. She is fun, but a little difficult to figure out, at first.
Editor's note: This image has been adjusted to fit 8 ½ X 11 paper

Now the bird is completed, sitting on a branch with its tail balancing it. This picture can be colored red for a cardinal, if you like or any other color that suits your favorite bird. It is a pretty picture and shows details of the bird’s wing, and his delicate tail. You can be more creative about the branch he is perched upon, but we wanted to place emphasis on the shape and style of the bird itself.

5. ar 5 times, gh 5 times
6. Space, ar 3 times, dots 4-5-6, l, gh 3 times
7. Space 4, ar, gh

This frilly Christmas tree is drawn using 7 lines down, 10 spaces across. It can be used to decorate a Christmas card or a place mat. The contraction AR and GH form the top of the tree and begin the flaring out of the branches to the left and right. The next 4 lines continue the basic triangular shape of the tree with the branching out of each line. Line 6 brings the branching in on each side and the dots 4-5-6 and the letter l suggest a trunk. Line 7 completes the tree and flairs out the trunk a bit. This is an easy tree to draw and a pretty one to look at.

So What About Drawing; Instructions for Drawing Using Braille
Sailboat (Tiny)
Using English Braille Contractions

When you read a letter or word following a comma it needs to be Brailed, for example:
“Space 7, with” indicates that you need to space 7 cells and Braille the contracted word “with”

child = ch = dot 1, 6 ed = 1, 2, 4, 6 x = dot 1, 3, 4, 6
not = n = dot 1, 3, 4, 5

1. space, dots 4-5-6, ch
2. space, dots 4-5-6, space, ch
3. space, dots 4-5-6, space twice, ch
4. ed, x four times, n

The sailboat is a simple figure. It can be made as large as you want by using dots 4-5-6 for the mast, increasing the number of spaces by one for each line added. Make the boat length correspond to the width of the sail.
Shamrock (tiny)
Using English Braille Contractions

When you read a letter or word following a comma it needs to be Brailled, for example: “Space 7, with” indicates that you need to space 7 cells and Braille the contracted word “with.”

\[
\begin{align*}
\text{ow} &= \text{dot 2, 4, 6} \\
\text{o} &= \text{dot 1, 3, 5} \\
\text{gh} &= \text{dot 1, 2, 6}
\end{align*}
\]

1. space, ow, o
2. ow, o, ow, o
3. space twice, gh

The shamrock makes a fine decoration for papers, for cards, or to take home to show parents. It is easy to do and requires very little skill.

Truck (small)
Using English Braille Contractions and Punctuation

When you read a letter or word following a comma it needs to be Brailled, for example: “Space 7, with” indicates that you need to space 7 cells and Braille the contracted word “with”.

p = dot 1, 2, 3, 4  c = dot 1, 4  th = dot 1, 4, 5, 6  l = dot 1, 2, 3
wh = dot 1, 5, 6  o = dot 1, 3, 5  v = dot 1, 2, 3, 6  in = dot 3, 5
en = dot 2, 6  e = dot 1, 5  i = dot 2, 4  hyphen = dot 3, 6
number sign = 3, 4, 5, 6

1. p, c five times, th
2. l, space five, dots 4-5-6
3. l, space five, dots 4-5-6, l, c twice, wh
4. l, space five, dots 4-5-6, space four, c, th, o
5. v, in, c, en, hyphen twice, number sign, hyphen twice, in, c, en, number sign
6. space, e, hyphen, i, space five times, e, hyphen, i

This is a side view of a truck with a box-like trailer, a cab, a back and front wheel, and a light on the front. It uses 5 lines down and 14 spaces across. The idea can be expanded to make a school bus, using a series of contractions for as windows. It can be made more elaborate with the sloping hood and fancy windows of a car.
So What About Drawing; Instructions for Drawing Using Braille

Spaceship (tiny)
Using English Braille Contractions

When you read a letter or word following a comma it needs to be Brailled, for example:
“Space 7, with” indicates that you need to space 7 cells and Braille the contracted word “with”

ar = dot 3, 4, 5  gh = dot 1, 2, 6  was = dot 3, 5, 6  f = dot 1, 2, 4
c = dot 1, 4  d = dot 1, 4, 5  q = dot 1, 2, 3, 4, 5  his = dot 1, 2, 5
with = 1, 2, 4, 5, 6  er = dot 1, 2, 4, 5, 6  of = dot 1, 2, 3, 5, 6

1. space five, ar, gh
2. space three, was, f, c twice, d, his
3. with, full cell ten times, of
4. full cell twelve times
5. d, er, full cell eight times, q, f

This spaceship takes five lines down and twelve spaces across. It has a roundness to its shape and almost looks like an ornament hanging in the sky.

So What About Drawing; Instructions for Drawing Using Braille

Train
Using English Braille Contractions and Punctuation

Editor's note: use large paper, or turn the paper sideways; line feed down a few lines so you can add more smoke later

When you read a letter or word following a comma it needs to be Brailled, for example: 
“Space 7, with” indicates that you need to skip seven cells and Braille the contracted word “with”

s = dot 2, 3, 4  c = dot 1, 4  n = dot 1, 3, 4, 5  l = dot 1, 2, 3, 4
p = dot 1, 2, 3, 4  v = dot 1, 2, 3, 6  ed = dot 1, 2, 4, 6  for = full cell
in = dot 3, 5  en = dot 2, 6  ow = dot 2, 4, 6  ff = dropped f
dd = dropped d  colon = dot 2, 5  number indicator = dot 3, 4, 5, 6

1. space 3, s, space, space, ed, c 4 times, n
2. space 3, for, space twice, dots 4-5-6, space 4, l, space 12, in, c 9 times, en
3. space, ow, p, c, v, hyphen, number indicator, space 4, l, space 12, l, space 3, ff, colon, dd, space 3, dots 4-5-6.
4. space twice, l, space 8, l, space, p, c 8 times, th, space, l, space 3, v, hyphen, number indicator, space 3, dots 4-5-6
5. space, st, v, in, c, en, hyphen twice, in, c, en, r, colon, v, in, c, en, hyphen twice, in, c, en, number indicator, colon, v, in, c, en, number indicator, hyphen, v, in, c, en, number indicator
6. st, space twice, e, hyphen, i, space twice, e, hyphen, i, space 3, e, hyphen, i, space twice, e, hyphen, i, space 3, e, hyphen, i

This train has an engine, a flat car, and a box car. The engine has smoke coming out of the smokestack and has a cow-catcher in front of it. Hitched to the engine is a flat-bed car, and a box car with a roof and a door. With some ingenuity, this could easily become a modern passenger train. To draw it requires 6 lines down and 35 spaces across. This is a more difficult drawing to recognize tactually because it contains three separate objects with are linked together. It is very easily recognized visually, and has great appeal.
Rabbit (small profile)

Using English Braille Contractions

When you read a letter or word following a comma it needs to be Brailled, for example: “Space 7 cells, with” indicates that you need to space 7 cells and Braille the word “with”

\[
\begin{align*}
& s = \text{dot 2, 3, 4} \quad l = \text{dot 1, 2, 3} \quad e = \text{dot 1, 5} \quad i = \text{dot 2, 5} \\
& x = \text{dot 1, 3, 4, 6} \quad o = \text{dot 1, 3, 5} \quad \text{wh} = \text{dot 1, 5, 6} \quad gh = \text{dot 1, 2, 6} \\
& ar = \text{dot 3, 4, 5} \quad \text{en} = \text{dot 2, 6} \quad \text{in} = \text{dot 3, 5} \quad ow = \text{dot 2, 4, 6} \\
& \text{hyphen} = \text{dot 3, 6} \quad \text{the} = \text{2, 3, 4, 6} \quad \text{spirit} = \text{dot 4, 5, 6, s} \\
\end{align*}
\]

1. space, s, s, wh
2. space, gh, gh, ar, en, in, i, c, c, e, en
3. space, s, space 9 times, wh
4. ow, space 10 times, spirit, wh
5. space, wh, space 9 times, ar, e, i
6. the, x, hyphen 3 times, ar, ow, hyphen 4 times, o

This rabbit takes 6 lines down and 14 spaces across. It is a side view of a bunny lying down with its ears straight up and its fluffy tail behind. The back is hunched up a bit in readiness to jump. We use it in our books as a symbol of intermediate work, jumping from easy material into what is harder and will bring us to more difficult material later.
So What About Drawing: Instructions for Drawing Using Braille

Pumpkin (small)

Using English Braille Contractions and Punctuation

When you read a letter or word following a comma it needs to be Brailled, for example: “Space 7, with” indicates that you need to space 7 cells and Braille the contracted word “with”

\[
\begin{align*}
p &= \text{dot } 1, 2, 3, 4 \\
i &= \text{dot } 2, 4 \\
z &= \text{dot } 1, 3, 5, 6 \\
en &= \text{dot } 2, 6 \\
colon &= \text{dot } 2, 5 \\
c, \text{ dot } 1, 4 \\
s &= \text{dot } 2, 3, 4 \\
wh &= \text{dot } 1, 5, 6 \\
in &= \text{dot } 3, 5 \\
hyphen &= \text{dot } 3, 6 \\
parenthesis &= \text{dot } 2, 3, 5, 6 \\

Here is a rabbit that looks like a rabbit, with suggestion of indentations in his ears, with a hip line, a tail. He looks much different from the Easter Bunny, but he has a lot going for him, nevertheless.

The sailboat is easy to draw with its straight mast and its billowing sail. It is a good example of a picture that should be seen with two hands moving to get the idea of a continuing shape and an expanding image. Movement is introduced with the billowing sail and the waves in the water. Perspective is also suggested by the horizon of water at a different level than the bottom of the boat, making it apparent that the boat is closer to the viewer than the horizon. This is a nice picture to color—sky, water, sail, and boat.

This teddy bear has personality. He has a gleam in his eyes, eyebrows, a perky look about him. You can add to him by drawing a bow for a tie. You can put a bow on his head and a flair of skirt around his hind feet and “he” becomes a “she.” We call them Guildbear and Guildabear and we take them around with us when we display our books. They have great appeal, good PR.
Heart – Interposed (large)

Using English Braille Contractions

When you read a letter or word following a comma it needs to be Brailled, for example: “Space 7, with” indicates that you need to skip 7 cells and Braille the contracted word “with”

can = c = dot 1, 4  like = l = dot 1, 2, 3  every = e = dot 1, 5
i = dot 2, 4  so = s = dot 2, 3, 4  child = ch = dot 1, 6
gh = 1,2,6  ar = dot 3, 4, 5  in = dot 3, 5
which = wh = dot 1, 5, 6  enough = en = dot 2, 6
either = ei = dot 1, 5 and dot 2, 4

This series of hearts interposed upon one another takes 28 spaces across, 23 lines down. It is frilly and delicate looking-a fancy heart for Valentine’s Day. The design is simple, but the lines are not easy to follow and take a bit of finger dexterity to identify. Spacing is all important so that the hearts fit neatly into one another.

► Line feed one

This snowman takes up a whole page. He is wearing a hat with a brim and a scarf. He has some buttons down his front, eyes, a nose, and a mouth – all the basic parts of a typical snowman. With some imagination he can be carrying a broom, waving his hand, anything you want of a snowman.
Flag - Large
Using English Braille Contractions and Punctuation

When you read a letter or word following a comma it needs to be Brailled, for example: “Space 7, with” indicates that you need to skip 7 cells and Braille the contracted word “with”

Editors Note: Use large paper

p = dot 1, 2, 3, 4  c = dot 1, 4  l = dot 1, 2, 3  v = dot 1, 2, 3, 6
s = dot 2, 3, 4  a = dot 1  apostrophe = dot 3  th = dot 1, 4, 5, 6
wh = dot 1, 5, 6  number indicator = 3, 4, 5, 6

1. s, wh
2. wh, s

10. – 15. dots 4-5-6, p, c 37 times, th
11. dots 4-5-6, p, c 38 times,
12. – 22. dots 4-5-6, l
13. number indicator, v
14. v, number indicator

The flag shows placement of the stars, represented by the dots. The stripes can be colored. However, the chief value of this drawing is to show what the design on the American flag looks like. It is an easy picture to draw—the spacing, however, was tricky to figure out!
