

WaterViz Investigation 3

Activity Directions: For each instrument, think about the changes you hear in the musical data. Match each instrument to a water cycle component.

For each instrument:

1. Could you hear the instrument continuously or did it start and stop?
2. Did the pitch change (low/high)?
3. Did you hear other changes?

WaterViz Music Instrument used to represent water cycle data	Water Cycle Component
Cymbals	
Bass Guitar and French Horn	
Marimba	
Guitar	
Flute
