

FILLING YOUR

**TRANSPORTATION
TOOLBOX**

The Cost of Transportation

Directions:

How much does it cost a month to own and operate a vehicle? Your job is to find out the answers to questions below from at least one person. You can ask someone in your family, a friend, or a staff member at the *Filling Your Transportation Toolbox* program. Be prepared to share the information with the group on Friday.

1. What is the name of the person you interviewed?

2. What type of vehicle (e.g., car, truck, motorcycle) do they own?
3. What is their monthly payment?
If they say they do not have a monthly payment, ask them how much they paid each month before paying off their vehicle.
4. How much do they pay for insurance every 6 months?
5. How much do they pay for registration each year?
6. How much do they estimate they pay for gas each month?

7. How much do they estimate they pay each month for repairs?

With the information you gathered, estimate how much the person pays **each month** to own and operate their vehicle.
